

KitchenReface Completely change your kitchen.
Just pick a weekend.

This form is meant only as a printable aid for gathering your door sizes. You must enter your door order through the kitchenreface.com website - This is NOT a valid order form. By entering the order directly on the website it minimizes error, speeds delivery and provides real-time guaranteed pricing. Don't forget to account for your hinge overlay when measuring for your doors. For help with understanding how to measure your doors and understanding overlays watch our kitchen refacing how-to video.

To Calculate Door Size:

For 1/2" Overlay Hinges (Standard Overlay)

Door Width = Cabinet Opening Width + 1/2" (left side overlay) + 1/2" (right side overlay)

Door Height = Cabinet Opening Height + 1/2" (left side overlay) + 1/2" (right side overlay)

Butt Door Width = Cabinet Opening Width + 1/2" (Left side overlay) + 1/2" (right side overlay) - 1/8" (gap between doors)

Then divide by 2 to get the size of each door. Butt door height is same as a single door.

For 1 1/4" Overlay Hinges (Full Overlay - Minimizes the amount of cabinet that shows behind the doors)

Door Width = Cabinet Opening Width + 1 1/4" (left side overlay) + 1 1/4" (right side overlay)

Door Height = Cabinet Opening Height + 1 1/4" (left side overlay) + 1 1/4" (right side overlay)

Butt Door Width = Cabinet Opening Width + 1 1/4" (Left side overlay) + 1 1/4" (right side overlay) - 1/8" (gap between doors) Then divide by 2 to get the size of each door. Butt door height is same as a single door.
